## SUMMARY

Experienced software engineer based in Sydney, currently working with NCS Australia (formerly Dialog Information Technology). My expertise lies in full-stack development, where I contribute in building IT solutions for various clients. I hold a Bachelor of Information Technology from the University of Newcastle, with a focus on Systems Development.

I am looking to join a company of which I will be able to leverage my skills to assist and develop their technologies while continuing my growth as a software engineer.

Let's connect and explore how I can contribute to your team's success.

## SKILLS SUMMARY

**Backend:** C#, .NET, SQL, LINQ, API development

**Frontend:** JavaScript, Angular, HTML/CSS, Bootstrap

**Cloud & DevOps:** AWS, Azure, Git, Azure DevOps, Visual Studio

**CRM/Platform:** Dynamics 365 CE, Power Platform

**Soft Skills:** Communication, collaboration

## WORK HISTORY

NCS AUSTRALIA  
Sydney

Oct 2023 - present  
Software Engineer

- Full-Stack Web Development
- SQL Database Management/Support
- .NET Development - Angular Development
- AWS/Azure Management
- Dynamics 365 CE

DIALOG INFORMATION TECHNOLOGY  
Sydney (Dialog merged into NCS Au)

Jan 2022 - Oct 2023  
Graduate Developer

- Full-Stack Web Development
- .NET Development
- SQL Database Management/Support

## EXPERIENCE

### WEB DEVELOPMENT

For over 4 years at my current company, I have developed major enhancements and provided ongoing support across a variety of clients, of which involved developing and supporting full-stack web applications, API's, Microsoft Dynamics, Power Platform using tools and languages such as but not limited to: C#, Razor Pages, t-SQL, CSS, AWS, Azure, Power Pages, and NodeJS. I have worked with many clients across multiple projects, the following is a couple selected examples of project work I have been involved in:

- **Invoicing System:** Developed an automated web solution to replace manual Excel-based transaction recording for the NSW Government. Built an SQL-backed system using LINQ and stored procedures, with a user-friendly front end for the invoicing team. Improved accuracy, eliminated duplicate charges, and streamlined invoice management, earning positive feedback from both the team and the client.
- **Enhancements Project:** Built a custom Power Pages webpage embedded as an iFrame on a public site for a non-profit supporting expecting parents. Used custom JavaScript, JS libraries, and HTML to connect with Power Automate and the database, while implementing security measures for both the iFrame and confidential data.

### DYNAMICS AND API DEVELOPMENT

- Improved an API system integrated with Power Automate after a bug caused hundreds of duplicate emails to send. Investigated the C# API code, resolved the issue by adjusting key variables and methods, and added tracking data to support future problem management.
- Worked across 5 clients at the same time with a team of 2 to 6 people per client, involving support and enhancements, high collaboration and communication.

### SOFTWARE EXPERIENCE

- Visual Studio & VSCode, used with Xamarin/Maui, ASP.Net, .Net, Power Platform
- GitHub, AWS, Azure, API Development
- SQL Server Management Studio, Jmeter

## EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY  
Major in Systems Development

2019-2021  
University of Newcastle

- Software Development
- Database Development
- Web Development
- Mobile Application Programming
